INSTALLATION: Radio Plant 208, "Komintern"
 LOCATION: Leningrad, USSR
 B.E. NUMBER: []
 WAC NUMBER: 153

BRIEF NO.: B-81-57
 DATE: 6 Sep. 1957
 LAT.: 59°56'N
 LONG.: 30°14'E

25X1A

PHOTO DATA:

25X1D

REFERENCE:

ATMP: 0153-9997-4-25MA, 2nd Ed., Oct 1953

ENCLOSURE: [] aerial photograph of Radio Plant 208 "Komintern".

25X1D

REQUIREMENT NO. RR/HTA/E/R132/56: Describe changes since World War II in Radio Plant 208, "Komintern", Leningrad. If possible, confirm reported location and describe any visible radar or communications antennas.

REMARKS:

Radio Plant 208 "Komintern" was evacuated from Leningrad to beyond the Urals during World War II. Recent reports have indicated that this plant is again active in Leningrad. However, relocation to its original site on the western side of Vasil'yevskiy Island just north of the small boat basin, cannot be confirmed by [] photography. Identification of radar or communication antennas is precluded by the scale and quality of the photography.

25X1D

Comparison of [] photography of the original site reveals no major change. The site contains two three-story buildings, 65 by 45 feet and 100 by 65 feet, connected by a single-story building, 75 by 45 feet. One storage building 95 by 40 feet and three smaller buildings are also present.

25X1D

In a new fenced area which adjoins the original plant area on the northwest, six single-story buildings have been constructed since World War II. They vary in size from 200 by 20 feet to 65 by 30 feet. This area appears active and possibly houses an integral part of the plant.

Brief No.: B-81-57

25X1

25X1D Just east of the original site is another large area, partially fenced,
25X1D which may also be related. In [] this area contained eight single-story,
storage or shop-type buildings measuring 250 by 30 feet each, and eight
smaller buildings. A study of [] photography reveals that the eight large
buildings have been removed. The eight smaller buildings, the largest of
which is 160 by 25 feet, still, remain, but the area appears relatively in-
active and may be used primarily for storage.
